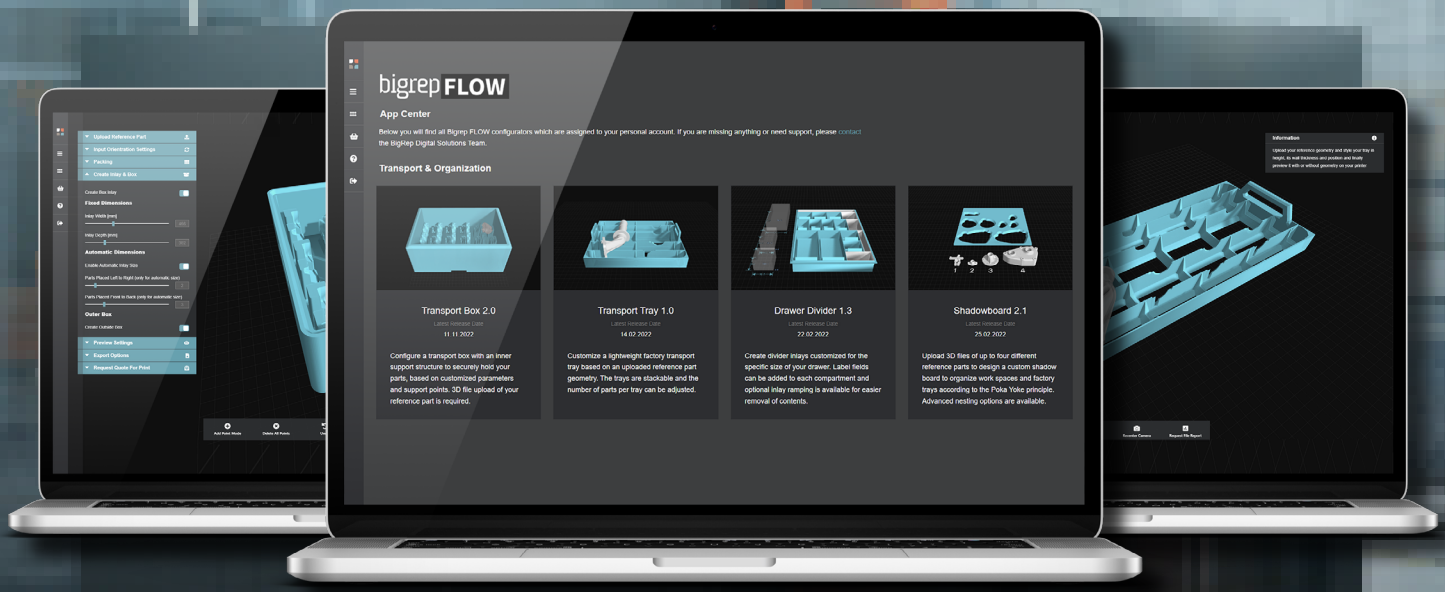
bigrep FLOW



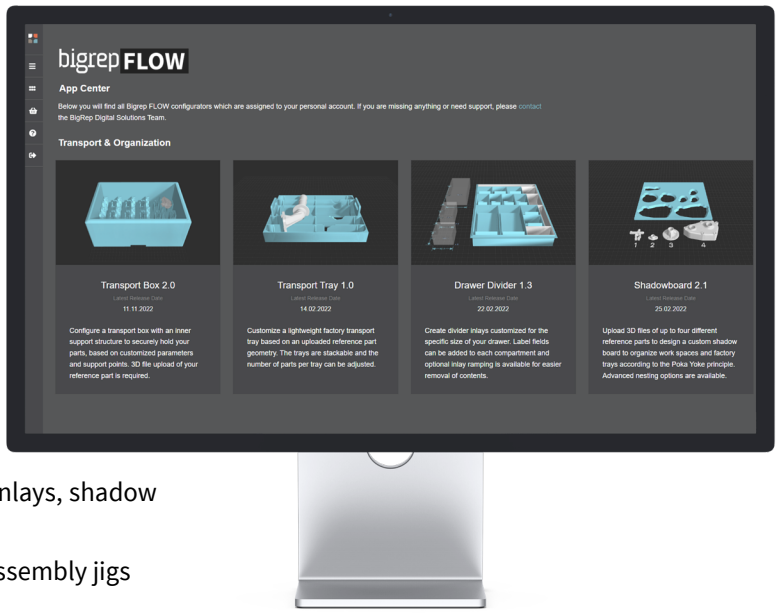
WORKFLOW **AUTOMATION** FOR **TOOLS** THAT **WORK**.

A new customizable SaaS solution that makes application engineering for 3D printed jigs, fixtures, and manufacturing aids **easier than ever**, with **no design skills or 3D printing experience required**.

THE FUTURE OF AUTOMATED DIGITAL MANUFACTURING

BigRep FLOW can replace an existing 3D workflow to save time and money. More than just automated design, the FLOW Apps create 3D printable tools for real-world use that meet benchmarks and qualifications with just a few clicks.

Perhaps best of all, BigRep FLOW lets you maximize the potential of additive manufacturing for your business but requires no experience in 3D printing or CAD software skills. Get the tools you need; faster, cheaper, and easier than ever. Examples of apps we developed with other customers include:



- **Packaging Apps** to configure transport boxes, trays, inlays, shadow boards, and storage dividers
- **Tool Apps** to create customized soft jaw fixtures and assembly jigs
- **Factory Apps** to make 3D printable spin conveyors

Create printable parts in minutes rather than days for **fast design iterations**

Intuitive cloud-based interface with **instant visualization** of design changes

Automated design for guaranteed printability with easy-to-use configurators

No experience required in 3D printing or CAD software skills

HOW TO GET FLOW?
FROM **YOUR NEEDS** TO **A CUSTOMIZED SOLUTION**:

1. GET IN TOUCH
Fill out the form and let us know more about your application.

2. DEVELOPMENT
We develop a custom BigRep FLOW app to create the production aids you need.

3. CONFIGURE
Get access to your App, upload your part file, and configure the tools for your part.

4. PRINT
Simply print your tool, in-house on your BigRep or with an external print service.
